

**JUNE 19, 2018**

**9 A.M. – 4 P.M.**

**SHERATON GRAND HOTEL**

**1230 J ST, SACRAMENTO, CA**

# **DIVING INTO DRINKING WATER**

## **Equity, Safety and Access**

***Safe, clean drinking water is a human right in California, but it continues to be inequitably distributed and inaccessible for too many people, with devastating consequences to our health.***

You're invited to participate in this critical convening of great minds and powerful organizations to ensure that all conversations about water in California include a focus on health and health equity. We will bring together water districts, advocates, researchers, educators, public health workers, policymakers and businesses to discuss cutting-edge strategies for ensuring all communities in California have safe, affordable and accessible water.

### **CONFERENCE TOPICS:**

- *Water Equity: Water as a Basic Human Right*
- *The History of Water in California: Where We Have Been and Where We Are Going*
- *Access to Safe Drinking Water in School and Communities*
- *Rethink Your Drink: Drink Water, Not Sugar*

***Let's come together to ensure water access and promote water consumption in every community in California and beyond.***

## **WHY FOCUS ON WATER?**

- **More than 1 million** Californians lack reliable access to safe drinking water.
- **One-quarter** of California schools may have been impacted by unsafe drinking water in the last decade and a half.
- **One-third** of California teens drink soda every day instead of water.
- Lower income, rural communities are hit hardest by contaminated drinking water and least likely to be able to afford healthy alternatives.
